

S-20 Switch
"3 Position Doo Dad Switch"

S-20

Turn on your Doo-Dad with style. Or your gizmo, whatchamacallit, or any other electric gadget your heart desires. Riders possessing a little imagination coupled with Yankee know-how always seem to find some electrical widget that makes riding all the more fun. Until now hooking that electric gizmo up was one thing; finding a way to turn it on and off was another case entirely.

"The Switch" fills the creative void facing the motorcycle gadgeteer by providing a classy way to turn his Doo-Dads on and off. An added feature is that "The Switch" can be wired to turn one thing on while turning something else off.

"The Switch" is a single throw, double pole, 3 position precision toggle switch rated for 5 amps at 6, 12 or 24 volts. The handlebar mount enclosure is injection molded polycarbonate with a black satin finish and fits 7/8" and 22 mm handlebars.
